### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 25 and 28-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamblin et al. US 6,607,522.

Hamblin et al. disclose it is contemplated that such a device may comprise a syringe in which the lipid, proteinaceous material, active agent and/or photosensitizer solutions are separated by a plate that contains serrations which will penetrate the photosensitizer containing compartment and then allow mixing of the contents of that compartment with the contents of the protein containing compartment. In that the operation of the kits will generally rely on photo-oxidative mechanisms and singlet

oxygen generation, one may wish to store the photosensitizer, the lipid, protein, polypeptide, peptide and/or active agent containing compositions in a high oxygen atmosphere or in an atmosphere which has a higher oxygen concentration or tension than usual (column 22, lines 25+).

Example 5, at column 32 describes a method in which a protein mixture is employed and activated with a stimulator to produce crystalline growths within an 8-well slide.

### ***Allowable Subject Matter***

3. Claims 26-27 and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach nor fairly suggest utilizing a second syringe in the method nor drying said crystallization promoting material prior to said dispensing said LCP material in said container.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
